### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAIL ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of Group 26 in the reply filed on 7/16/2008 is acknowledged. The traversal is on the ground(s) that D1 reference in the International Preliminary Examination Report did not render the independent claims 66, 69 and 102 unpatentable. Applicant's request for reconsideration of the restriction of the last Office action is persuasive and, therefore, the restriction requirement of that action is withdrawn and new restriction requirement is in the following:

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 66 – 68, 83, 85 – 101, 111, 114, 117, 120, and 123 - 124, drawn to a rotating body of a printing press including a barrel with a temperature control medium flow channel with an **insert**.

Group II, claim(s) 69 – 82, 84, 105, 115, 118 and 121, drawn to a rotating body of a printing press including a barrel with a temperature control medium flow channel which is formed in a **thermal insulating material**.

Group III, claim(s) 102 – 110, 113, 116, 119, 122, and 125 - 138, drawn to a rotating body of a printing press including a thermal insulating material interposed between the base body and the outer body as a **cylindrical sleeve**.

3. Inventions listed as Group I - III do not directly relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.1, they lack the same or corresponding special technical features for the following reasons: the inventions I - III as claimed do not share the common technical features (in bold) recited in the independent claims, which establish a lack of unity under PCT Rule.

4. A telephone call was made to Douglas R. Hanscom on 10/29/2008 to request an oral election to the above restriction requirement, but did not result an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
